REPORT OF PRINCIPAL AND SCHOOL IMPROVEMENT COUNCIL

Hartsville Middle School's focus for the 2007-2008 school year was to increase student achievement through the use of integrated literacy instruction and incorporated technology instruction.

The program focus, "Linking Literacy to Life," was integrated into every course across the curriculum. The core teachers (science, social studies, math, and ELA) taught a literacy class each day. The class included a time of independent reading where each student self-selected reading material. During the independent reading time, the teacher held student conferences with individual students. A conference log was maintained by the teacher, noting students' fluency and knowledge of literary elements. The class also included a literacy lesson each day. The lessons were created by the ELA coordinating teacher. Most lessons used science and social studies content text to teach particular literacy skills. Science, social studies, and math teachers were able to transfer these literacy lessons into their regular content classes. Exploratory teachers also participated in "Linking Literacy to Life" by using magazine articles, internet sites, newspapers, picture books and research in teaching their content standards.

In order to assess student needs, the MAP test, a diagnostic computer based test, was administered three times throughout the year in math and ELA and once in science. The results from this test allowed teachers to individualize student instruction based on specific needs. Administrators and coordinating teachers were able to use the MAP test results to plot student growth, revealing areas of teacher strengths and areas in which improvement was necessary.

As a means for better equipping our students, an emphasis was placed on technology integration in every classroom. Teachers were trained and encouraged to use various forms of technology in the classroom, including United Streaming, PowerPoint, ActiVotes, and Promethean Boards (an interactive wall mounted computer).

Everyone at Hartsville Middle School worked extremely hard to make this a great school year. I would like to thank students, parents, and staff for making the second year in our new building a great success. I am looking forward to making the 2008-2009 school year exciting and academically challenging for all of our students.
